

STUDENT ENTREPRENEURSHIP INTERNSHIP

You have a business creation project? Create, innovate and launch during your internship period !

The entrepreneur internship is open to Master students during the professional immersion year (gap year), it is also accessible to International BBA students in the 4th year.

The EDHEC Entrepreneurs incubator opens the doors to its co-working spaces located within its campuses in Lille and Nice. A great opportunity to take advantage of the collective emulation between start-ups!

In order to support your development and optimize your chances of success, the incubator also sets up a structured and comprehensive support for your project.

Our start-up Cosmic Junior offers distance teaching and private lessons the fundamentals of programming to young people aged 7-15.

I chose to do my internship on my project because I am trying to live my dream : create a startup. I give myself the means to achieve my ambitions!

I benefit from excellent support from the EDHEC Entrepreneurs incubator thanks to individualized coaching and a great team within the incubator.

HOW TO APPLY ?

Submission of applications before June 6, 2021 & before November 2, 2021
Online application file : <https://entrepreneurs.edhec.edu/fr/stage-etudiant-entrepreneur>

I created Hoya Paris, a women's clothing and accessories e-shop just 1 year ago, during my 3rd year. Passionate about fashion since I was little, I didn't want to wait until the end of my studies to get started. I opened the first Hoya Paris pop-up store last summer and the concept was a real success. I am currently looking for new premises to renew the experience. Thanks to EDHEC Entrepreneurs, I have the opportunity to devote myself entirely to my business in order to develop it. The resources made available to us allow me to evolve in this growth strategy, notably with legal and financial advice.
